

# PRESS RELEASE

## EntreHubs

The ENTREHUBS project continues to make a significant difference in entrepreneurship education by creating sustainable cooperation models between universities and businesses across Europe. The project's training materials and collaboration platforms enable both educators and students to develop their entrepreneurial skills and generate innovative solutions. With the support of non-university partners RESET, STIMMULI and BOSEV, the project further promotes entrepreneurship culture by collaborating with local communities.

## ENTREHUBS COLLABORATIONS & DISSEMINATION ACTIVITIES

As part of the project's dissemination activities, value creation hubs (VCHs) are being disseminated not only among academic institutions, but also among local businesses and communities. These hubs provide a platform for students to increase their entrepreneurial experience while developing solutions for the needs of the business community. RESET and STIMMULI contribute significantly to the project as organizations specialized in social innovation and entrepreneurship education. In this way, entrepreneurship education and cooperation with the business community will spread across Europe.

The project results will be disseminated through conferences and seminars organized in various European cities and the entrepreneurship culture will reach all students. The project's online resources and training materials will be available to universities and other educational institutions, thus creating a long-term impact.

# VALUE CREATION HUBS

Value Creation Hubs (VCHs) are collaboration platforms designed to bring together universities, students, educators and business representatives to create innovative solutions to real-world problems. Through workshops, hackathons and project development sessions organized in these centers, students have the opportunity to develop their entrepreneurial skills in practice by working directly with businesses. While educators guide students with interdisciplinary approaches, business representatives add value to the projects by providing a real-world perspective. The projects developed at the centers provide social benefits in areas such as sustainability, digital innovation and social impact, while offering professional networks and long-term collaboration opportunities for participants. Value Creation Hubs are an important model for strengthening both local and international entrepreneurship ecosystems.
