

PRESS RELEASE

EntreHubs

The ENTREHUBS project, launched under the Erasmus+ Program with the aim of mainstreaming entrepreneurship education in universities across Europe, has developed an innovative e-learning Platform for educators. This e-learning platform has become a comprehensive guide for educators who want to incorporate entrepreneurship elements into the academic curriculum. The platform offers practical and accessible solutions to educators by including materials such as digital resources, case studies, collaborative projects and lesson plans. The platform is available in 4 different languages: English and the languages of the partner countries: German, Turkish and Greek.

PLEASE CLICK FOR THE E-LEARNING PLATFORM

E-LEARNING PLATFORM

The e-learning platform aims to adopt a broader and interdisciplinary approach when providing entrepreneurship training to university lecturers. The project considers entrepreneurship not only as the process of starting a new business, but also as the ability to create value from social, cultural and environmental perspectives. Educators will be able to use these resources to develop their students' creative thinking skills and build stronger links with the business world. The digital lesson plans, which are also available in the project's online repository, will be supported by online learning and collaboration models so that educators can instill entrepreneurial awareness in their students across disciplines.

This initiative will make it easier for universities across Europe to integrate entrepreneurship elements into their curricula and improve the quality of teaching by supporting the development of educators in this field. The e-learning platform will be made available in open access, benefiting the entire academic world.
